The invention relates to an isolated AXOR89 polypeptide (G-protein CC coupled receptor) and its polynucleotide. The novel AXOR89 polypeptide CC and polynucleotide encoding the polypeptide, is useful for identifying CC and polynucleotide (or inhibitors) that are potentially useful in treating conditions associated with an AXOR89 imbalance, such as CC bacterial, fungal or protozoan infections, cancers, pain, asthma, cC parkinson's Disease, diabetes, obesity, anorexia, bulinia, acute heart CC failure, hypotension, hypertension, urinary retention, osteoporosis, cangina pectoris, myocardial infarction, stroke, ulcers, allergies, benign CC prostatic hypertrophy, migraine, vonitting, psychotic and neurological CC disorders, anxiety, schizophrenia, manic depression, delirium, dementia, CC dyskinesias, such as Huntington's Disease or Gilles dela Tourette's cyndrome. The polynucleotide sequence may also be used for chromosome CC localisation or tissue expression studies. The AXOR89 is used as a CC vaccine or to produce fusion proteins. The present sequence is human axona control of the control 
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        anorexia; bulimia; acute heart failure; hypotension; hypertension; ulcer; stroke; urinary retention; osteoporosis; angina pectoris; schizophrenia; myocardial infarction; allergy; benign prostatic hypertrophy; migraine; vomitting, psychotic; neurological disorder; anxiety; manic depression; delirium; Huntington's Disease; Gilles dela Tourette's syndrome; dementia; dyskinesia; gene; ss.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          밁
The present specifically claimed human cDNA sequence (located on CC chromosome 13) encodes a purinergic-related G-protein coupled receptor CC (GPCR) of the invention. GPCRs constitute a major class of proteins CC responsible for signal transduction within a cell. Upon binding of a CC ligand to the extracellular portion of a GPCR, a signal is transduced CC gPCR proteins can be divided into five families, family I contains the CC purinergic GPCRs (e.g. the P2Y receptors). P2Y receptors are CC characterised by their selective responsiveness towards ATP and its CR analogues, some also respond to UTP. The invention comprises a human CC g-protein coupled receptor protein and encoding nucleic acids. The GPCR CC protein and nucleic acids of the invention are useful in the treatment of the invention is useful for: the development/identification of the protein in biological fluids; identifying compounds which modulate of the protein in biological fluids; identifying compounds which modulate the activity of the GPCR, or the interaction of the GPCR and a molecule with which it normally interacts; and treating a disorder characterised by an absence of, or inappropriate expression of the GPCR protein. The GPCR nucleic acids of the invention are useful in diagnostic assays to identify changes in the GPCR nucleic acid that lead to pathology; CC controlling GPCR expression, and in gene therapy to treat patients with aberrant GPCR gene expression. The GPCR nucleic acids can also be used in the production of transgenic animals.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            1014
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Human purinergic-related G-protein coupled receptor (GPCR) cDNA sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               AAK98323;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 AAK98323 standard; cDNA; 1014

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Ś
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             유
The invention relates to an isolated P2Y-like receptor polypeptide
CC (ABB83818-ABB83819) which is also referred to in the specification as
CC HIPHUM 0000037. An effective amount of a substance (agonist or
CC antagonist) which modulates P2Y receptor activity is useful to treat a
CC subject having a disorder that is responsive to P2Y-like receptor
CC modulation. The disorder that is responsive to P2Y-like receptor
CC prophylaxis of a disorder that is responsive to stimulation or modulation
CC prophylaxis of a disorder that is responsive to stimulation or modulation
CC of P2Y-like receptor activity. Disorders which may be treated include
CC colon cancers, asthma, COPD, Crohn's disease, irritable bowel syndrome,
CC gastroenteritis and colitis, inflammatory bowel syndrome, ulcerative
CC colitis, rheumatoid arthritis, viral diseases, bacterial infections,
CC autoimmune diseases, dermatitis, glomerulonephritis allergies, allergic
CC rihinitis, inflammatory pain and general inflammation such as tendonitis,
CC polymyositis or prostatitis. The invention provides alternative
CC substances for the treatment of immunological and inflammatory diseases.
CC The present sequence is that the P2Y-like receptor variant encoding gene
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            An isolated P2Y-like receptor polypeptide (HIPHUM 0000037) which can used for the identification of agonists and antagonists which may be used to treat an immune or inflammatory disease -
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    01-SEP-2000; 2000GB-0021524.

etc., are used for diagnosis and (gene) therapy of diseases that are (in)directly associated with (I) or its expression products. No diseases are specified but as (I) is expressed only in thyroid tissue, (I) is presumed to be involved in regulation of thyroid function. The present

The invention relates to the human P2Y11i gene (I), including its 5' and 3' untranslated regions, located on chromosome 13 and encoding a G protein-coupled receptor. (I) and related mRNA, cDNA, protein, antibodies

(e) selecting
(f) assessing
(g) determinin
(h) assessing

    (a) assessing whether a patient is afflicted with prostate cancer;
    (b) monitoring the progression of prostate cancer in a patient;
    (c) assessing the efficacy of a test compound to inhibit prostate cancer in a patient;
    (d) assessing the efficacy of a therapy for inhibiting prostate cancer in a parient;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          The invention relates to an isolated nucleic acid molecule (I) comprising a nucleotide sequence given in Tables 1-9 (ABV0001-ABV62213) of the specification or its complement. (I) is useful for:

(a) assessing whether a patient is afflicted with prostate cancer;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Novel isolated nucleic acid molecule associated with cancerous state of prostate cells and correlating with presence of prostate cancer, useful

Novel isolated nucleic acid molecule associated with cancerous state of

77X77X7X7X7X

```
proteins in a two-hybrid or three-hybrid assay, and in pharmacogenomic analysis. The proteins and nucleic acids encoding them are useful for disgnosis and treatment of disorders selected from disorders of the spleen, lung such as Good pasture's syndrome, liver such as viral hepatitis, brain such as Alzheimer's disease, haematopoietic stem cells such as lymphoma, kidney such as Heymann nephritis, bone such as Paget's disease, colon such as Crohn's disease, uterus and endometrium such as systemic lupus erythematosus, disease of the skin such as actinic keratosis, disorders of the heart such as myocarditis, disorders involving blood vessels such as Kawasaki syndrome, disorders involving the thymus such as DiGeorge syndrome, disorders involving B-cells such as poleoniasms, and disorders involving B-cells such as poleoniasms, and disorders of the breast such as inflammations, and disorders involving the testis and epididymis such as teratoma. Numérous examples of cach type of disorder are given in the specification.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Query Match 99.9%;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   3135
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            The invention relates to the human P2Y1li gene (I), including its 5' and 3' untranslated regions, located on chromosome 13 and encoding a G protein-coupled receptor. (I) and related mRNA, cDNA, protein, antibodies etc., are used for diagnosis and (gene) therapy of diseases that are (in)directly associated with (I) or its expression products. No diseases are specified but as (I) is expressed only in thyroid tissue, (I) is presumed to be involved in regulation of thyroid function. The present sequence is that of the P2Y1li encoding genomic sequence.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                New human P2Y1li gene, useful for treatment and diagnosis of associated diseases, and related proteins, antibodies and modulators, encodes G protein-coupled receptor -

On Sep 28, 2001 this sequence version replaced gi:15787734.
During sequence assembly data is compared from overlapping clones.
Where differences are found these are annotated as variations
together with a note of the overlapping clone name. Note that the
variation annotation may not be found in the sequence submission
corresponding to the overlapping clone, as we submit sequences with
only a small overlap as described above.
This sequence was finished as follows unless otherwise noted: all
regions were either double-stranded or sequenced with an alternate
chemistry or covered by high quality data (i.e., phred quality >=
30); an attempt was made to resolve all sequencing problems, such
as compressions and repeats; all regions were covered by at least
one plasmid subclone or more than one M13 subclone; and the
assembly was confirmed by restriction digest. The following
abbreviations are used to associate primary accession numbers given
in the feature table with their source databases: Em:, EMBL; Sw:,

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     http://www.sanger.ac.uk/Projects/C_elegans/wormpep This sequence was generated from part of bacterial clone contigs of human chromosome 13 constructed by the Sanger Centre Chromosome 13 http://www.sanger.ac.uk/HGP/Chr13 RP11-721F14 is from the library RPCI-11.3 constructed by the group of Pieter de Jong. For further details see http://www.chori.org/bacpac/home.htm VECTOR: pBACe3.6 IMPORTANT: This sequence is not the entire insert of clone RP11-721F14 It may be shorter because we sequence overlapping sections only once, except for a short overlap. The true left end of clone RP11-199B17 is at 55646 in this sequence. The true right end of clone RP11-65L19 is at 2000 in this

This sequence is a seven transmembrane helix receptor candidate predicted from the whole human genome sequences using our automated system that contains programs of gene finding (GeneDecoder), sequence search, motif-domain assignment and transmembrane helix prediction.
And the sequence is submitted by the collaborative project between [Computational Biology Research Center (CBRC), National Institute of Advanced Industrial Science and Technology (AIST)] and [Genome Crience Nivision, Research Center for Advanced Science and
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  ACACTCTGACCCATGGACTGCAAACTGACAGCTGCCTTAAGCAGAAAGCACGAAGGCTAA 780
